I am a passionate technology enthusiast who constantly seeks opportunities to expand my knowledge and skills in the ever-evolving tech industry. With a focus on fullstack development, I possess a comprehensive skillset that enables me to work across the entire software stack.

Work Experiences

Tonjapan – Japan

Mar 2024 – Present

Fullstack Developer – Fulltime

- Responsible for developing web and mobile applications. As part of the development team, I create end-to-end solutions using Next.js for web frontend and React Native for mobile apps.

Curaweda Palagan Innotech – Bandung, Indonesia

Sep 2024 – Dec 2024

Fullstack Developer – Freelance

- Responsible for developing a crucial module for a client's website using full-stack technologies including React and Express.js, focusing on creating seamless user experiences and efficient backend integration.

MBKM Ruangguru – Jakarta, Indonesia

Aug 2022 – Dec 2022

Asssistant Mentor – Contract

- Assisted fellow participants in the frontend track of MBKM at Ruangguru by providing guidance and clarification on mentor-provided materials.

Practicum for Database Concepts – Bali, Indonesia

Feb 2022 – Jun 2022

Asssistant Lecturer – Contract

- Provided comprehensive guidance on SQL fundamentals, normalization techniques, ERD creation, and other database concepts to participants.

Skills

Frontend: Next.js, React.js, Tailwind, Shadcn UI, Radix UI, Framer Motion, Three Fiber

Backend: Express.js, Node.js, PHP, Laravel

Database: MySQL, MongoDB, Redis, PostgreSQL

Languages: Indonesia, Conversational Proficiency in English

Other: GIT, Linux, Docker, Figma, Typescript, Redux, Zustand

Projects

Nene Spa

An interactive and responsive spa booking application built using React for the user interface, GSAP for stunning animations, and Express.js for a robust backend. The project features a seamless booking experience and user authentication.

Binar Harmoni Indonesia

Developed a full-stack booking platform for psychologists, therapists, and daycare services using React and Express.js. The app includes scheduling features with real-time session time calculations and dynamic availability for therapy appointments.

Hargagila.id

At Tonjapan, I am currently in the process of developing a hotel booking website specializing in discounted rates using Next.js and React Native. While the project has not been released yet.

Manacika Bali

Manacika Bali is an e-commerce platform dedicated to showcasing and selling authentic Balinese paintings and handcrafted products. Built using the cutting-edge Next.js 14, Prisma, and Shadcn UI library.

Virtourpura.my.id

My current project involves developing an interactive information system using Next.js 13 technology for my thesis. It includes showcasing interactive virtual tours with 3D elements of existing buildings, enhancing user experiences.

SIJalan

SIJALAN utilizes Leaflet maps for interactive road visualization, enabling users to explore and manage road data efficiently. The system also incorporates authentication for user.
